

Midland Surveying Recognizes Achievements of Licensed Surveyors

January 1, 2009

Troy Hayes, PLS, President of Midland Surveying, Inc. in Maryville and St. Joseph, Missouri recently passed examination to become a Licensed Professional Land Surveyor in the State of South Dakota. This license was necessary to obtain in order to complete one of several on-going projects that Midland Surveying has with the Omaha District of the U.S. Army Corps of Engineers. In addition to South Dakota, Mr. Hayes is also a licensed land surveyor in Missouri, Iowa and Kansas.

Adam Teale, PLS, Partner and Project Manager at Midland Surveying, Inc. of Maryville and St. Joseph, Missouri recently passed examination by the Certified Federal Surveyor Program (CFedS). As a Certified Federal Surveyor, Mr. Teale has the authority to survey federal lands and Indian Lands within the individual states in which he is licensed, (Missouri and Iowa). There are roughly 330 Certified Federal Surveyors in the United States and Mr. Teale is 1 of 16 CFedS in Missouri.

The CFedS Program was established by the Bureau of Land Management with assistance by the Bureau of Indian Affairs. The program is authorized by the Secretary of the Interior of the United States. For more information on the CFedS program visit <http://www.cfedS.org/>.

Rick Mattson, PLS, Vice President and Branch Manager of the Midland Surveying, Inc. office in St. Joseph, Missouri recently passed examination to become a Licensed Professional Land Surveyor in the State of Colorado. This license was necessary to obtain in order to complete one of several on-going projects that Midland Surveying has with the Omaha District of the U.S. Army Corps of Engineers. In addition to Colorado, Mr. Mattson is also a licensed land surveyor in Missouri and Kansas.
